Templates. The scenario we use is that we take a hard drive or partition in which you have important data. We want to retrieve that data. that contains important data. In such a scenario, the most important step is Recovery of password. You will need to backup your data in a different partition or disk, so that you can do a clean Install. Alternatively, you can save the data in a different location on the same disk as the partition where you want to recover the password. How to recover the password for Windows XP, Windows Vista, Windows 7? If you are looking to recover the lost Windows password, then you are at the right place. You can get a clean Windows XP installation on your computer in a few minutes. Just like any other Windows installation, you just need to prepare the computer and follow the simple steps. 1. This will take a few minutes to complete, depending on the size of your hard drive or partition. 2. Please ensure that the primary drive on your computer is not partitioned. You can do this using Disk Management. 2. Click the Start button and then type diskmgmt.msc in the search box. Locate the Windows partition in the list of drives and right-click the partition to get the list of options. Then, select Change Drive Letter and Paths. 3. Click Change. The Windows operating system has assigned a drive letter and path to each of your hard drives. You will be asked if you want to change the drive letter and the path. Select the drive letter or path that you want to change and then click OK. 4. The drive will be displayed on the left pane. Now that we have the primary drive or partition, we can proceed. Once the drive or partition that you want to recover the password is selected, click on the Change Password button. 5. The next step is to choose the drive where the data you want to recover is. Since we already have the primary drive in the list, click on the C: drive and select the correct partition that contains the data. Then, select the option Recover the Password from the list. We need the Recovery Mode to find out what Windows password is being used. Once the recovery process is finished, the data will be found in the file windows_password.reg. Now you can access your data and recover your password. How to recover the password for Windows Vista, Windows 7, Windows 8, Windows 8.1? If you are looking to recover the lost Windows password, then you are at the 82157476af
